
Donchian Channel Strategy Pdf Download

In the trading system, we are going to develop a strategy based on the breakout of the Donchian channel. The indicator to select in the Market Analyzer is Price at. In particular, we want to determine whether it matters whether the price is above or below, and what percentage of the time the price is above or below the center line. We will use the Donchian Channel Indicator to determine if the price is below or above the center line of the Donchian Channel indicator. If the price is above the center line of the Donchian channel indicator, then we call the Donchian channel an ascending channel.
