Google Search For Windows 10 With License Code PC/Windows

Google Search for Windows 10 is a lightweight application that provides access to multiple Google services in an easy to use interface. You can use this tool for both searching the Internet and browsing the results in the same window. Google Search for Windows 10 review: Official Google Search for Windows 10 Version 0.1 Google Search for Windows 10 is a lightweight application that provides access to multiple Google services in an easy to use interface. You can use this tool for both searching the Internet and browsing the results in the same window. When you start the program for the first time, the tutorial will walk you through all the available features. It includes details and animations that demonstrate how to use the app on both PCs and touch-enabled devices. Use Google Search from a Windows Store app instead of a web browser The main purpose of the program is to provide you with all the means of accessing the Google search engine. Thus, you can type in the keywords or use the connected microphone to input the criteria. If you own a tablet, the voice search feature allows you to greatly improve your efficiency when you need to find online resources. PC users can also access the app from the Charms menu by simply starting to type the keywords and selecting Google Search from the right panel. Search history, Google apps, and more Unlike similar tools that only provide the results and use the default Internet browser to open the links, this tool is able to browse any page. For instance, you can search for a movie, visit the official page and watch the trailer without using other applications. The app can store the search history and the number of visited pages from the result list. This feature enables you to easily remember previous queries and revisit the relevant pages. If you are worried about your privacy you can easily delete certain items from the list. Faster way of accessing Google Search A useful feature is the possibility to access Gmail, Google Docs, YouTube and other Google services. Additionally, you can search for a keyword in the current page which highlights all the word occurrences. If Google is your preferred engine, then the Google Search app provides you with a smooth experience whether you are searching, browsing the web pages or using other Google services.
