Photoshop is a program for creating images, but it's also commonly used for graphic design purposes. The program enables users to manipulate and place elements on an image to create illustrations, logos, and other graphic designs. This article takes a brief look at both the graphic design uses of Photoshop and the methods for creating a poster or illustration in Photoshop.

**Photoshop Tutorial: Illustrator Tutorial** In this Photoshop tutorial, professional designer Brian Richard will teach you all about his powerful vector illustration program and show you how to create a brand new illustration or poster design using Photoshop.

**Illustrator Basics** Before using Photoshop for any purpose, it is important to understand Illustrator's inner workings first. Adobe Illustrator is a vector graphics program for creating illustrations that can be manipulated with a pen and then scaled up or scaled down without loss of quality. This means that Illustrator can handle any size or shape you need it to draw and that it will always look great even if it's scaled up or down. This is also important because Photoshop does not have an alpha channel like Adobe Illustrator. This means that Photoshop will lose any transparency where transparency is needed in Illustrator. This is a big issue when trying to recreate an Illustrator design on a Photoshop file. To tackle these issues, it's helpful to learn how to work in Illustrator first so that you have the tools, knowledge, and understanding in place to work successfully in Photoshop. This tutorial will give you a quick overview of the basics and fundamentals of Illustrator. It's nothing more than an introduction, but if you go further

Diego Luna, a former Mexican soccer player, is putting his casting skills to use for one of the first time on the silver screen. The actor recently wrapped production on the Warner Bros. war film “Ghosts of the Gulf,” which also stars John Travolta and Ronda Rousey. The film will be released on Dec. 15. “I’m really excited to see the end result, because it’s only taken the last two and a half years of working towards it,” Luna tells Variety of his role in the action thriller. Luna says he has spent significant time in the United States in the years preceding the production of the film. He recalls spending a week in New Orleans filming scenes that later appeared in the movie. The actor, who was born in Mexico, says he was born into acting because of his parents’ professions. His parents were both actors on the professional Mexican stage in the 1970s and 1980s. Luna says he still looks to the cast and crew of the film for inspiration as he follows the industry. “We’re taught how to act and how to tell a story by the way we talk and interact with the other actors and crew,” he says. “As actors, we’re not watching a movie with the audience in mind. We’re thinking about what we’re going to say to each other — what information we want to share and how we can use that to tell the story.”

About Us  
INDEXING, INDEXING, INDEXING! We are The Indexing Company. We help people to do what they already know how to do: index books. We are located in Raleigh, NC and currently employ 7. We do everything through email and we know what time it is because we are not in an office, we are all-virtual. We are all retired and a family of five, and we never took stock in having jobs — or not having jobs. We have had the same job for over 30 years and we have never done a formal tour in any of them. We just do what we enjoy and do it well. We’re not a large company, but we have a number of contributors and associates who have been with us for many years, and who always support us in our projects. We make our living on commissions
