Best Smart Tools V30300 1527 Â· DVD ROM 2.0 Multi-Login PC Â· Bonus Games On DVD Mapping the fundamental groups of M-theory and type IIB string theory on K3. In type IIB string theory on K3 the holomorphic Euler characteristic of a K3 with a specific K3 Euler characteristic divisor, a meromorphic theta function and a constant value of a specific modular form is mapped to the Gromov-Witten invariant of K3. We show that the fundamental group of the moduli space of instantons maps isomorphically on the fundamental group of the moduli space of complex curves of a K3 with the same Euler characteristic. Using this fact, we analytically continue the above mapping on the fundamental group level. We observe that the fundamental group is not a modular invariant. Using Ramanujan's conjecture on a one-form on the moduli space of complex curves, we analytically continue the meromorphic theta function on the moduli space of complex curves of a K3 with a specific K3 Euler characteristic divisor. Using a formula of theta functions on the fundamental group of a K3, we find that the one-form is written in terms of the Virasoro operators in the K3 sigma model.

Q: How to remove a particular string from a string How to remove a particular word from a string? "hello world" "abcdefg hello world" I want to remove "hello world" from both the string above. I tried with this var s1 = "abcdefg hello world"; var s2 = "hello world"; s1 = s1.replace(s2,""); console.log(s1); The output is "abcdefg hello world" But I want the output as "abcdefg" A: You could use replace function with RegExp object. const s1 = "abcdefg hello world"; const s2 = "hello world"; const result = s1.replace(/(hello world)/g, " 1cdb3666d
