My Tasks Today is a simple app you can use to manage tasks that you have to handle right away, whether in the current or next day. It's stripped of any unnecessary options to create a straightforward, distraction-free zone, so you can focus on one job at a time. Modern UI task organizer for today and tomorrow The task organizer is wrapped in a Metro look that's optimized for touch-supported devices, thanks to the fact that its buttons can be tapped instead of clicked, depending on what's more comfortable for you. The main window has a dark theme with green accents. To add a new task to the database, right-click somewhere on the panel to bring up the white, horizontal bar on the bottom side, and click the "Add" on the bottom-right corner. Add and mark tasks as completed You can set the task display name ("Title") and description ("Content") as well as schedule it for the current or next day. Make sure to click "Save" to apply modifications. It's possible to create as many tasks as you want, as well as to edit their properties. All jobs are remembered by the tool on exit. Also, you can right-click to select more jobs and apply operations for all of them at once, whether you want to make them as completed, move them to the current or next day, pin them to your Start Screen or Menu for quick access, delete or upload them to OneDrive.
